Building Competitiveness, Nova Scotia's White Paper on economic development, released in February 1984, contained a number of recommendations designed to increase the competitiveness of businesses in our province. One of these recommendations committed the government to "... examine the purchasing of all publicly supported bodies in Nova Scotia with a view to harmonizing purchasing and tendering practises, making access easier for small business and stimulating new local sources of production and supply."

Selling to Nova Scotia's Public Sector Market is the government's first action in implementing the above recommendation. Subsequent editions of this publication will broaden the scope of, and information contained in, this initial version.

It is the intention of the White Paper Implementation Committee to help Nova Scotia producers and suppliers to increase their business with the Nova Scotia government. To ensure that this publication meets your needs for information, we urge you to complete the enclosed questionnaire and return it, along with any comments you may have. Your cooperation will help us to better help you in future.

Yours very truly,

Roland Thornhill

INTRODUCTION

The White Paper on economic development commits the Nova Scotia government to optimizing Nova Scotia content in its purchasing, thereby promoting economic development. Public sector buying represents a large potential to Nova Scotia manufacturers and suppliers, but success depends on buyers and sellers knowing their market.

For suppliers, it can be a difficult and time-consuming task to determine the purchasing needs and personnel of all the many public sector buyers in the province: the three levels of government, their various departments and agencies, the hospitals, educational institutions and utilities. By the same token, it is not always easy for public sector buyers to know about the capabilities of local producers and suppliers.

The purpose of the Purchasing Guide, then, is to open doors. For sellers, the guide lists the many products and services that are bought by Nova Scotia government departments and agencies, provincial crown corporations, municipal governments and other public sector buyers. Knowing what these buyers purchase, however, only opens the door part way. Knowing who to contact to discuss individual needs and requirements and to ascertain capability to fill those requirements, is also important.

This guide attempts to explain how purchasing works and who takes part in purchasing decisions. Purchasing contacts in each department and agency are listed by name, and address and telephone numbers are provided. Suppliers should use the guide to contact the people listed and acquaint them with their products, services and capabilities. The appropriate people from the Purchasing Agency should also be contacted, so suppliers can be assured that their names appear on the relevant suppliers' lists, from which tender bids are invited.

The Purchasing Guide is the first such publication to be undertaken by the Government of Nova Scotia on such a large scale. A smaller scale project aimed at purchasing activity related to offshore oil and gas exploration and development proved to be successful. Provincial suppliers were acquainted with the requirements of the oil companies and their major contractors, and purchasing agents with the latter were acquainted with provincial sources of supply. The publication that has resulted for this area of economic activity is being used as a model for this larger project which hopefully, will meet the success of its predecessor.

As in any first attempt, there may be areas that have been inadvertently left uncovered. A questionnaire is, therefore, included in the publication for readers' comments and suggestions. By completing and returning the questionnaire, readers will help ensure that the second edition of the guide meets their needs for information.

The Purchasing Guide will be updated on a regular basis to help Nova Scotia producers and suppliers sell to the public sector market. The result will mean more jobs for Nova Scotians and more dollars remaining in the province to fuel the province's continued economic growth.

HOW TO USE THIS GUIDE

This guide is divided into four sections.

SECTION I

Contains an alphabetical index and a category index listing supplies and equipment, and services purchased by Nova Scotia government departments and agencies.

SECTION II

Gives information on Nova Scotia government departments and agencies, describing their functions and listing the names and addresses of those responsible for purchasing. Departments are listed alphabetically.

SECTION III

Gives information on other public sector buyers in Nova Scotia: crown corporations, municipal governments, school boards, universities and colleges, health care institutions, the other Atlantic Provinces, and the federal government.

SECTION IV

Gives an alphabetical listing of all public sector purchasers listed in Sections II and III, and the corresponding page numbers.

All purchasing contacts are numbered consecutively in Section II. These contact numbers are listed in the alphabetical index in Section I after the name of the product or service.

To find out who buys your product, locate it in the alphabetical index and note the contact numbers. Match the contact number with those in Section II for complete names, addresses and telephone numbers.

Listings in Section III are not included in the alphabetical index. In these instances, suppliers will have to contact the agencies directly for information.

If your product or service is not listed in Section I, we would like to know so that it can be included in the next edition of the guide.

SELLING TO THE NOVA SCOTIA GOVERNMENT

The Purchasing Structure

The Government of Nova Scotia has a centralized purchasing system. The Nova Scotia Government Purchasing Agency exists to purchase materials and supplies for government departments and their associated agencies, boards, and commissions. The departments and agencies for which the Purchasing Agency is responsible are included in the list that makes up this section of the guide. Under certain circumstances, such as in specific emergency situations, some departments have been given authority to purchase certain items directly. The specific exemptions that have been granted by the Director of Purchases to cover such items are noted in the list as well.

Purchasing Procedures

The initiative for the items that are purchased rests with the individual departments and agencies. Provided the items are not exemptions, departments request the Purchasing Agency to obtain the products to fill their needs.

The Purchasing Agency maintains lists of suppliers for all types of products. Invitations to bid on items that departments require are drawn from these lists. A minimum of three independent suppliers are invited to submit bids for each tender request unless the item is only available from less than three suppliers. Individual departments also solicit bids through publicly advertised tenders appearing in daily and commercial newspapers throughout the province.

The bids are opened at 9:00 a.m. of the first working day following the closing date at the Purchasing Agency office (see address below). Those submitting tenders can learn the results of the bids by attending the opening. To attend the opening, bidders are required to notify the Agency (at 424-5545) of their intention to do so before 4:30 p.m. on the day the tender closes.

The Purchasing Agency is responsible for buying the products the provincial government requires at the best price possible, taking into account the quality of the product, the place of manufacture and availability, and the area buying practices of the government. The Nova Scotia Government prefers to buy from Nova Scotia manufacturers and producers first, Maritime second, and Canadian third. Wherever possible, it is the practice of the Nova Scotia government to buy from <u>bona fide</u> dealers in the geographic area of the province where the supplies are to be used. To this end, the Purchasing Agency has developed regional vendor lists.

Becoming a Supplier

The first step to becoming a supplier is to ensure that the product or products you sell are bought by government. This can be determined by reference to the list of supplies and services in Section I of this guide. If you wish further information

about particular items, you may consult the contacts within each department and agency that are provided.

The next step is to register with the Purchasing Agency so that your name is placed on appropriate supplier lists. Although some items are tendered publicly, most purchasing is a result of bids being requested from suppliers already listed with the Agency. The chances of being able to bid, therefore, are enhanced if the government knows you exist and what you sell.

To register with the Agency you must complete an application form that can be obtained from the Director of Purchases (see address below). Once your application form is received, your name will be added to the list of suppliers.

If you have questions for the Purchasing Agency, please contact:

DEPARTMENTAL FUNCTIONS AND PURCHASING CONTACTS

Knowing the various responsibilities of government departments may help determine which are likely candidates for your particular product or service. Departments are listed in this section with a short description of their responsibilities and functions. Also included is the name, address and telephone number of the purchasing contact in each section. The Purchasing Agency Contact responsible for the department is also listed.

Some departments have been granted authorization by the Purchasing Agency to purchase certain materials, sometimes under specified conditions, directly rather than through the Agency. Exemptions, where applicable, are listed briefly at the end of each departmental listing.

DEPARTMENT OF AGRICULTURE AND MARKETING

The Department of Agriculture and Marketing does not concern itself solely with professional farmers. The department provides soil surveys, participates in land use planning, supplies expertise in weed control and, for any Nova Scotian resident, provides chemical laboratory service on soil and water anaiysis. As its name implies, the Department of Agriculture and Marketing is actively engaged in marketing, including product promotion, market information, and marketing boards.

FEDERAL GOVERNMENT

Supply and Services Canada

The booklet **Selling to SSC** describes the various activities of Supply and Services Canada. This is a common service agency that annually buys close to $3 billion worth of goods and services nationally in support of the programs of other federal government departments and agencies. This booklet provides information about these goods and services and answers questions most frequently asked by businesses.

The **SSC Supply Centre Directory** lists the locations and purchasers of the goods and services described in **Selling to SSC.** Purchasing is conducted at various regional supply centres, district and sub-offices located throughout Canada.

These publications, by Supply and Services Canada, are available free from:
